

Java Hands-On Exam: Student Information System**1. Code Screenshots****Display.java**

```
JAVA > HandsOnExam > Display.java > ...
1  package HandsOnExam;
2
3  public interface Display {
4      void displayInfo();
5  }
6
```

Student.java

```
JAVA > HandsOnExam > Student.java > ...
1  package HandsOnExam;
2
3  public class Student extends Person implements Display {
4
5      private String studentID;
6      private String course;
7
8      public Student(String name, int age, String studentID, String course) {
9          super(name, age);
10         this.studentID = studentID;
11         this.course = course;
12     }
13
14     public String getStudentID() {
15         return studentID;
16     }
17
18     public String getCourse() {
19         return course;
20     }
21
22     public void setStudentID(String studentID) {
23         this.studentID = studentID;
24     }
25
26     public void setCourse(String course) {
27         this.course = course;
28     }
29
30     @Override
31     public void displayInfo() {
32         System.out.println("Name: " + getName());
33         System.out.println("Age: " + getAge());
34         System.out.println("Student ID: " + studentID);
35         System.out.println("Course: " + course);
36     }
37 }
```

Person.java

```
JAVA > HandsOnExam > Person.java > Person > displayInfo()
1  package HandsOnExam;
2
3  public class Person {
4
5      private String name;
6      private int age;
7
8      public Person(String name, int age) {
9          this.name = name;
10         this.age = age;
11     }
12
13     public String getName() {
14         return name;
15     }
16
17     public int getAge() {
18         return age;
19     }
20
21     public void setName(String name) {
22         this.name = name;
23     }
24
25     public void setAge(int age) {
26         this.age = age;
27     }
28
29     public void displayInfo() {
30         System.out.println("Name: " + name);
31         System.out.println("Age: " + age);
32     }
33
34 }
```

TestStudentSystem.java

```
JAVA > HandsOnExam > TestStudentSystem.java > TestStudentSystem > main(String[])
1  package HandsOnExam;
2  import java.util.Scanner;
3
4  public class TestStudentSystem {
5      public static void main(String[] args) {
6
7          Scanner scanner = new Scanner(System.in);
8
9          System.out.print(s: "----- Student System -----\\n\\n");
10
11         System.out.print(s: "Enter student name: ");
12         String name = scanner.nextLine();
13
14         System.out.print(s: "Enter student age: ");
15         int age = scanner.nextInt();
16         scanner.nextLine();
17
18         System.out.print(s: "Enter student ID: ");
19         String studentID = scanner.nextLine();
20
21         System.out.print(s: "Enter course: ");
22         String course = scanner.nextLine();
23
24         Student student = new Student(name, age, studentID, course);
25
26         System.out.print(s: "\\n----- Student Information -----\\n\\n");
27         student.displayInfo();
28         scanner.close();
29     }
30 }
```

Sample Output

```
----- Student Information System -----  
  
Enter student name : Louis Zane De Jesus  
Enter student age  : 22  
Enter student ID   : 22-1234  
Enter course       : Bachelor of Science in Information Technology  
  
----- Student Information -----  
  
Name      : Louis Zane De Jesus  
Age       : 22  
Student ID : 22-1234  
Course    : Bachelor of Science in Information Technology
```
